*Brain* provides researchers and clinicians with the finest original contributions in neurology. Leading studies in neurological science are balanced with practical clinical articles. Its citation rating is one of the highest for neurology journals, and it consistently publishes papers that become classics in the field. The Editorial Board reflects both the journal's truly international readership and wide coverage.

The leading journal in its field, *Bioinformatics* publishes the highest quality scientific papers and review articles of interest to academic and industrial researchers. Its main focus is on new developments in genome bioinformatics and computational biology. Two distinct sections within the journal - Discovery Notes and Application Notes- focus on shorter papers; the former reporting biologically interesting discoveries using computational methods, the latter exploring the applications used for experiments.
